Sequence 33, Application US/09817538

Sequence 33, Application US/09817538

Patent No. US20020137162A1

GENERAL INFORMATION:

APPLICANT: Li, Zuomei

APPLICANT: Benefils, Claire

TITLE OF INVENTION: Antisense Oligonucleotide Inhibition of Specific Histone

TITLE OF INVENTION: Deacetylase Isoforms

FILE REFERENCE: 106101.144

CURRENT APPLICATION NUMBER: US/09/817,538

CURRENT APPLICATION NUMBER: US 60/192,157

PRIOR APPLICATION NUMBER: US 60/192,157

NUMBER OF SEQ ID NOS: 33

SOFTWARE: PatentIn version 3.1
                                                                                                                                             ô

Sequence 6064, Application US/10289762

Sequence 6064, Application No. US-10-289162

Publication No. US-2040006218A1

GENERAL INFORMATION:
TITLE OF INVENTION: Chlamydia pneumoniae genomic sequence and polypeptides, fragmenter
TITLE OF INVENTION: thereof and uses thereof, in particular for the diagnosis, preverant Reference: 9710-003-999

FILE REFERENCE: 9710-003-999

CURRENT APPLICATION NUMBER: US/10/289,762

CURRENT FILING DATE: 2003-03-27

NUMBER OF SEQ ID NOS: 6849
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                    US-10-210-429-24/c
